

# Tutoring??????????

Just maybe your child needs a Mentor?

Most of the time your child understands their schoolwork, but needs an explanation and encouragement in completing the necessary steps in order to be successful.

Some students don't understand the importance of using their planner for their daily assignments or future projects and tests.

Some students must be informed of what is in their control and what exactly is their responsibility in making good choices.

No child sets out to fail; they just don't know how to be successful.

While working through the student's academics a mentor;

I will be supportive in encouraging the student to overcome obstacles.

I will listen first and speak to the concerns of the student.

I will push....just enough to raise the bar.

If a student wants school to be easier they need get better at it.

New groups now being formed to meet at Borough Public Library.

Interested;
